Frontend Developer with 4+ years of experience building and shipping production web applications. Deep expertise in the React and TypeScript ecosystem — scalable component architecture, real-time interfaces, API integrations, and performance-focused development. Proven track record working independently on full-cycle projects and contributing inside cross-functional teams.

EXPERIENCE

Frontend Developer · **Freelance & Contract**   *2021 – Present*
Remote

– Designed and delivered end-to-end web applications using React, Next.js, and TypeScript — choosing between SSR, SSG, and SPA based on performance and SEO requirements.
– Built responsive, accessible UIs with TailwindCSS, Shadcn UI, and Radix UI, and developed shared component libraries reused across multiple projects.
– Implemented real-time features — live dashboards, data streams, and WebSocket connections — handling frequent updates without performance degradation.
– Managed complex application state using TanStack Query for server state and Redux Toolkit / Zustand for client state, keeping data flow predictable and maintainable.
– Collaborated with backend engineers on API design, integrated RESTful and NestJS-based services, and configured CI/CD pipelines via GitHub Actions.
– Worked across diverse domains — educational platforms, management systems, and data-heavy dashboards — consistently delivering clean, maintainable codebases.

PROJECTS

Nordfiord   A complete ecommerce platform built solo from scratch — Next.js 15 App Router storefront with full SEO, a React 19 admin panel with analytics dashboard, and a NestJS REST API. Integrated Stripe checkout, implemented role-based access control, and handled image delivery via Cloudflare R2.
